INTRODUCTION

Estero Llano Grande State Park, the Weslaco wing of the World Birding Center, encompasses approximately 200 acres of restored wetlands and subtropical thorn-scrub forest. The park is located in the heart of the subtropical Lower Rio Grande Valley, a four-county area that has unmatched biotic diversity, documenting 512 species of birds, over 300 species of butterflies and over 1,100 species of plants.

Estero Llano Grande State Park is seated at the geographic center of the World Birding Center network and is the site with the largest wetlands environment. This former agricultural field has been restored to thriving wetlands and flourishing woodlands through cooperative efforts from the Texas Parks and Wildlife Department, the World Birding Center, the City of Weslaco and Ducks Unlimited. Since its opening in June 2006, Estero Llano Grande State Park has documented over 247 species of birds with an additional 41 species likely to occur within the park. Many of these birds are subtropical species typical of eastern Mexico and are not found north of the Lower Rio Grande Valley. Some of the characteristic species of the park include Black-bellied Whistling-Duck, Fulvous Whistling-Duck, Plain Chachalaca, Least Grebe, Neotropic Cormorant, Roseate Spoonbill, Wood Stork, Black-necked Stilt, Red-crowned Parrot, Groove-billed Ani, Green Kingfisher, Great Kiskadee, Green Jay and Altamira Oriole. Within its first year of opening, Estero Llano Grande State Park gained attention by attracting a rarely seen bird, the Northern Jacana, which resided in the park for over three months.

This checklist, compiled by John Arvin and updated by park staff, is based on observations by numerous individuals and includes species which have been observed within or passing over the park. Because the park is relatively new, the checklist also includes species expected to be seen within the park boundaries. Nomenclature and organization for this checklist follow the A.O.U. *Check-list of North American Birds*, 7th edition, 1998, as currently supplemented.

For information on how to contribute your sightings to a state wide bird database, visit Texas eBird online at www.ebird.org/tx/about/whatisbird.html. We would greatly appreciate reports to our visitor's center of any bird designated as a visitor (v), rare (x), not previously recorded (without √) or not on this list. You may also send reports by mail to Estero Llano Grande State Park, World Birding Center, 154 A. Lakeview Drive, Weslaco, Texas 78596.

Please help us protect the natural avian communities in our parks by refraining from using playback tapes of bird songs. Frequent use of these tapes disrupts normal avian activity patterns and essential territorial behavior, and may lead to nest failure. Thank you for your cooperation.

CITATION

Arvin, J.C. 2007. Birds of Estero Llano Grande State Park: A Field Checklist. Natural Resources Program, Texas Parks and Wildlife Department, Austin, Texas.

In 1983, the Texas Legislature created the Special Nongame and Endangered Species Conservation Fund. This fund may be used for nongame wildlife and endangered species research and conservation, habitat acquisition and development and dissemination of information pertaining to nongame management. Money for this fund is obtained through private donations and sale of nongame wildlife art prints and stamps. This fund now gives Texans a unique opportunity to help support this state's valuable and sensitive nongame resources. Your individual contributions and purchases of nongame art prints and stamps will help determine the level of nongame conservation activities in Texas. For more information call toll-free (1-800-792-1112) or contact: **Nongame and Endangered Species Program, Texas Parks and Wildlife Department, 4200 Smith School Road, Austin, Texas 78744.**
